- Git
- MongoDB
- TailwindCSS
- Ant Design

Experience

- **Front-End Developer**
  Paraf holding Company   June 2023 - Present

  - **https://paraf.app**

  Developed a Progressive Web Application (PWA) using Next.js, Tailwind CSS, Context API, and Ant Design. Contributed to a dual-panel design catering to wholesale and retail users. Key responsibilities included implementing the "Add Price" feature and optimizing the advanced search functionality. Successfully delivered a feature-rich PWA with a focus on user experience and received positive feedback for intuitive features. Actively involved in ongoing enhancements and future development planning.

  - **https://front.imo.prhm.ir**

  Implemented the web application for i-motion Sports Club, one of the largest sports clubs in Mashhad with multiple branches in other cities. Implemented sections for package sales and session reservations for athletes. Additionally, implemented a section for trainers to manage club attendance times and record athletes' training programs.

- **Front-End Developer**
  Parham online Company   April 2023 - June 2023
  https://parhamonline.ir

  - **https://gisheh7.ir**

  Built using React, Next.js, Tailwind CSS, SASS, and Context API

this ticket-selling website for Iranian cinemas offers a seamless and responsive experience.

Users register securely, navigate a user-friendly homepage, and access detailed movie information with showtimes.

Utilizing a wallet system, users fund accounts for seat reservations and ticket purchases, processed securely through various Iranian payment methods. User profiles manage data and transactions.

The admin panel aids cinema operators in managing listings, showtimes, and seat availability, with features like sales tracking. Reviews, ratings, and notifications enhance user engagement.

● **Front-End Developer**

GreenWeb Company 🛒 May 2022 - April 2023

Implemented responsive and browser-compatible enterprise web application like process maker using React.js, CSS Modules, styled-components and Sass.

developed Progressive Web Application(PWAs) with a mobile-first approach using React and optimized the applications by decreasing the load time by ~30%.

Used Git version control system to manage source code

Skills: Web Applications · HTML · WebSocket · Next.js · Progressive Web Applications (PWAs) · SASS · tailwind · React.js · JavaScript · Cascading Style Sheets (CSS)

Projects
